DUTCH BULBS

OFFERED FOR SALE BY

*J. J. Grullemans & Sons,*

West-End-Nurseries.

ESTABL. 1854.

LISSE-HOLLAND.

PRINTED BY MULDER, LEIDEN (HOLLAND).

*Gentlemen,*

We have much pleasure in presenting you our Bulb-Book for 1907, the **largest** and **most complete** issued by any Dutch Firm.

Our yearly growing bussiness, shows that our efforts to see orders executed with all possible speed, and with best class bulbs and plants **only**, are crowned with success.

To Firms with whom we had up to present no dealings we shall be glad to furnish them with such references which will give them sufficient confidence, that their orders if placed with us, are in good hands. In recommending our bulbs to the **Wholesale Trade** we wish to assure our customers that they will be well pleased when receiving our goods.

No doubt we have put our prices so that in most cases you will find them correct Should you however have a lower offer from an other reliable Dutch House, we shall be glad to be informed, and we promise to do all what is posible to meet you.

Lisse as you may be aware is now the leading center of the Bulb Trade.

Trusting we may be favored with a continuance of your esteemed commands.

Yours respectfully,

J. J. GRULLEMANS & SONS.

---

## COMPLAINTS.

No complaints can be entertained unless made on **receipt** of the goods, and we can not take any responsibility as to their flowering as so much depends upon their treatment, but every precaution is taken to sent nothing but first sized well matured bulbs such as will under ordinary circumstances produce the very finest flowers and give the utmost satisfaction.

**Early orders are respectfully solicited.**

# Special terms of payement.

---

To parties with satisfactory references we allow Credit until the 1<sup>st</sup> of March 1908.

If longer Credit is required, please say so when ordering. In case we do not consider a customer trustworthy for ordinary credit we can demand payement and any time.

## ACCOUNTS, PAID WITHIN.

1 month from date of invoice are entitled to 5<sup>0</sup>/<sub>10</sub> discount.

2 months „ „ „ „ „ „ „ 4<sup>0</sup>/<sub>10</sub> „

3 „ „ „ „ „ „ „ 3<sup>0</sup>/<sub>10</sub> „

 *Accounts not paid within 12 months after date of invoice will then be drawn against atsight.*

*Orders from unknown correspondents must be accompanied by satisfactory references or one-half the amount of bill. Balance of amount to be paid on arrival of goods, such payment are subjected to 5<sup>0</sup>/<sub>10</sub> discount on the full amount of the account.*

---

## Terms.

**All bulbs sold subject to being unsold on receipt of order.**

**Emballage or Packing** materials will be charged at costprice.

**All shipments** made at purchasers risk and account.

**Insurance** will be effected if desired, **Shipping instructions** should be sent with each order, and will be followed carefully, otherwise we will use our best judgment as to route.

---

# NOTICE.

25 roots will be charged at 100 rate.

250 at 1000 rate.

Programs should be addressed:

**Grulleman, Lisse, Holland.**

If wiring, goods will leave with the next steamer from Rotterdam or Amsterdam.

## Double Chrysanthemum flowered Anemones.

Cable words.

p. 100. p. 1000.  
s. d. s. d.

The Chrysanthemum flowered Anemones are absolutely distinct from the ordinary double Anemones, the petals are all of the same form and beautifully imbricated, the plants are of very large size and produce an immense quantity of grand flowers. Highly recommended.

<b>In mixture, all</b>	violet and lilas . . . . .	10	—	95	—

**Galanthus Elwesi.**  
**DUTCH GROWN BULBS.**  
**Finest in Holland.**

We import every year a big lot of these **Galanthus** from Turkey to be planted on our own grounds, with the results that we have been able to supply the finest and largest bulbs in the trade.

It was by no means rare to find amongst last years, bulbs as big as medium sized tulip.

On account of the increased demand we have much pleasure to inform our customers that we have planted for this season a fine lot, and shall be glad to quote **prices** and **send samples free on demand.**

**Samples may be had from the 15<sup>th</sup> of June.**

## Gladiolus Hollandia.

### A new Brenchlyensis variety.

A free growing variety with flowerspikes rather longer than those of *Gladiolus Brenchlyensis*.

The flowers are large and well opened and of exceptionally good form, even the smaller bulbs often produce **from 30 to 40 flowers on a single spike.**

The salmon shade rose color, makes it very distinct and delicate.

Planted in open ground. it is sure to give satisfaction, while as cutflower it is certain to find a ready sale.

# Novelties 1907.

Flower of a Regelio-Cyclus Iris.

## Regelio-Cyclus (onco-Regelia) Iris.

Awarded on the different London shows with first class  
Certificates and Awards of merit

This beautiful new race of Iris, flowers and cultivates with great easiness, comparing with the Onocyclus Iris (Iberica, Lorteti etc.) who are most difficult to cultivate. The flowers are of the same size of ordinary Onocyclus, and of satiny white, rose, braunish or violet ground, and are veined black. The flower-stems are strong and of good length, and carry generally three to four flowers, while from three to four flowerstems on a plant may be expected.

- Aspasia**, Very showy flower, dark violet purple, petals mahogany brown, beautifully spotted, grand variety . . . . . each 6 —
- Charon**, F. C. Certificate London May 17. '04. Color dark brown veined black, extra . . . . . each 4 6
- Eurydice**, Grand variety, with lilac rose flowers, drooping petals on a lilac ground, veined dark violet. . . . . each 5 —
- Hebe**, Free flowering variety, with dark indigo-blue blooms on a silvery netted ground . . . . . each 3 6
- Hecate**, Of this beautiful variety are the upper petals soft rosy white, the lower petals on a silvery ground are veined brown and bronze, extra each 3 6
- Hera**, strong grower with flowers of a beautiful ruby red color bronze blue shaded . . . . . each 3 6
- Hesperia**, Very large petals, lower part of flower silvery white veined chocolate brown, very delicate, extra. . . . . each 3 6
- Iphigenia**, F. C. Certificate London May 17, '04, Grand velvety purple blooms of which the lower part of the petals are greyish white, spotted brown each 5 —
- Ises**, Award of merit London May 17. '04. Very large, with grand flowers of a rubyred selfcolor with gray and purple veins, easily grown. This variety may be called on of the most beautiful of this new race . . . each 3 6
- Psyche**, Award of merit London May 17. '04. Flowers are on a silvery white ground, veined brown, a superb variety, highly recommended. . . each 4 6
- Sirona**, Dark lilac violet, with short but broad petals which on a greyish white ground are blackish veined. Each petal bears a black spot in the middle each 3 6
- Thetis**, Something like Charon with strong upholding flower petals. The lower petals are mahogany veined brown and spotted on a yellowish ground each 4 6

*We need not say that recommendation is almost unnecessary for these Iris, where ever money has been spent on flowers we feel sure that it never will have been spent better than on these.*

	<b>Rosea</b> , very strong, (Crowns for forcing) . . . . .	5	—	40	—

## NOTICE.

The Dutch forcing crowns we guarantee to give the greatest satisfaction but they should be forced **after** January.

We must advise our customers to order early and to lay the crowns immediately in, the roots well covered, leaving the crowns fully exposed to the air, so, that the frost can freely reach them.

The flower after this treatment will be equal in size and quality to those produced by the best German or Berlin Crowns.

## Convalaria Fortin Clumps.

**Per 100 40/—.**

We offer the above for the first time and although the price is rather high no grower will feel sorry to have paid this extra money, for one must first have seen a clump of these in bloom to be convinced what a tremendous difference there is between these and an clump of the ordinary old Dutch variety.

**Only a limited quantity to offer.**

## Montbretsia Speciosa.

The **Montbretsia** which we are sure will be one of the leading varieties in the future, color bright orange red, on very strong stems. We dare say there is even amongst the more expensive varieties **no better**. If cut and placed in water flowers will last over a fortnight.

Having before we offered it to the trade, cultivated a large stock of this grand variety, we are now in a position to offer it very reasonable.

**Price per 100 2 — per 1000 17 6.**

DUTCH BULBS

OFFERED FOR SALE BY

*J. J. Grullemans & Sons,*

West-End-Nurseries.

ESTABL. 1854.

LISSE-HOLLAND.

PRINTED BY MULDER, LEIDEN (HOLLAND).

*Gentlemen,*

We have much pleasure in presenting you our Bulb-Book for 1908, the **largest** and **most complete** issued by any Dutch Firm.

Our yearly growing bussiness, shows that our efforts to see orders executed with all possible speed, and with best class bulbs and plants **only**, are crowned with success.

To Firms with whom we had up to present no dealings we shall be glad to furnish them with such references which will give them sufficient confidence, that their orders if placed with us, are in good hands. In recommending our bulbs to the **Wholesale Trade** we wish to assure our customers that they will be well pleased when receiving our goods.

No doubt we have put our prices so that in most cases you will find them correct. Should you however have a lower offer from an other reliable Dutch House, we shall be glad to be informed, and we promise to do all what is posible to meet you.

Lisse as you may be aware is now the leading center of the Bulb Trade.

Trusting we may be favored with a continuance of your esteemed commands.

Yours respectfully,

J. J. GRULLEMANS & SONS.

---

## COMPLAINTS.

No complaints can be entertained unless made on **receipt** of the goods, and we can not take any responsibility as to their flowering as so much depends upon their treatment, but every precaution is taken to sent nothing but first sized well matured bulbs such as will under ordinary circumstances produce the very finest flowers and give the utmost satisfaction.

Early orders are respectfully solicited.

# Special terms of payement.

---

To parties with satisfactory references we allow Credit until the 1<sup>st</sup> of March 1908.

If longer Credit is required, please say so when ordering. In case we do not consider a customer trustworthy for ordinary credit we can demand payement and any time.

## ACCOUNTS, PAID WITHIN.

1 month from date of invoice are entitled to 5<sup>0</sup>/<sub>10</sub> discount.

2 months „ „ „ „ „ „ „ 4<sup>0</sup>/<sub>10</sub> „

3 „ „ „ „ „ „ „ 3<sup>0</sup>/<sub>10</sub> „

 *Accounts not paid within 12 months after date of invoice will then be drawn against at sight.*

*Orders from unknown correspondents must be accompanied by satisfactory references or one-half the amount of bill. Balance of amount to be paid on arrival of goods, such payment are subjected to 5<sup>0</sup>/<sub>10</sub> discount on the full amount of the account.*

---

## Terms.

**All bulbs sold subject to being unsold on receipt of order.**

**Emballage or Packing** materials will be charged at costprice.

**All shipments** made at purchasers risk and account.

**Insurance** will be effected if desired. **Shipping instructions** should be sent with each order, and will be followed carefully, otherwise we will use our best judgment as to route.

---

# NOTICE.

25 roots will be charged at 100 rate.

250 at 1000 rate.

Telegrams should be addressed:

Grullemans, Lisse, Holland.

If wiring, goods will leave with the next steamer from Rotterdam or Amsterdam.

All Parrot tulips quaranted true to name.

## Parrot Tulip. = Sensation.

The most unique and rare Parrot Tulip of late, the flowers produced are of **immense size**, the petals never being smaller than **nine inches in length**. The color is that an ordinary Bybloom tulip, violet and yellowish white.

No wonder this tulip received on the **Temple Show** through its rarity, the greatest attention of all amateur tulip growers.

Price \$ 5.50 each.

## Gladiolus Hollandia.

### A new Brenchlyensis variety.

A free growing variety with flowerspikes rather longer than those of Gladiolua Brenchlyensis.

The flowers are large and well opened and of exceptionally good form. even the smaller bulbs often produce **from 30 to 40 flowers on a single spike.**

The salmon shade rose color, makes it very distinct and delicate.

Planted in open ground, it is sure to give satisfaction, while as cutflower it is certain to find a ready sale.

per 100 \$ 1.70; per 1000 \$ 16.—

## Novelties, Hardy Iris

Awarded on the different London shows with first class  
Certificates and Awards of merit

This beautiful new race of Iris, flowers and cultivates with great easiness, comparing with the Onocylus Iris (Iberica, Lorteti etc.) who are most difficult to cultivate. The flowers are of the same size of ordinary Onocylus, and of satiny white, rose, braunish or violet ground, and are veined black. The flowerstems are strong and of good length, and carry generally three to four flowers, while from three to four flowerstems on a plant may be expected.

Cable words.

- Aspasia**, Very showy flower, dark violet purple, petals mahogany brown, beautifully spotted, grand variety. . . . . each 1.50
- Charon**, F. C. Certificate London May 17. '04. Color dark brown veined black, extra . . . . . each 1.40

<b>Rosea</b> , very strong, (Crowns for forcing . . . . .	2.40	22.—

**NOTICE.**

The Dutch forcing crowns we guarantee to give the greatest satisfaction but they should be forced **after** January.

We must advise our customers to order early and to lay the crowns immediately in, the roots well covered, leaving the crowns fully exposed to the air, so, that the frost can freely reach them.

The flower after this treatment will be equal in size and quality to those produced by the best German or Berlin Crowns.

**Convalaria Fortin Clumps.****Per 100 9.60.**

We offer the above for the first time and although the price is rather high no grower will feel sorry to have paid this extra money, for one must first have seen a clump of these in bloom to be convinced what a tremendous difference there is between these and an clump of the ordinary old Dutch variety.

### Montbretsia Speciosa.

The **Montbretsia** which we are sure will be one of the leading varieties in the future, color bright orange red, on very strong stems. We dare say there is even amongst the more expensive varieties **no better**. If cut and placed in water flowers will last over a fortnight.

Having before we offered it to the trade, cultivated a large stock of this grand variety, we are now in a position to offer it very reasonable.

Price per 100 —.50      per 1000 4.—

DUTCH BULBS

OFFERED FOR SALE BY

*J. J. Grullemans & Sons,*

West-End-Nurseries.

ESTABL. 1854.

LISSE-HOLLAND.

---

PRINTED BY MULDER, LEIDEN (HOLLAND).

*Gentlemen,*

We have much pleasure in presenting you our Bulb-Book for 1909, the **largest and most complete** issued by any Dutch Firm.

Our yearly growing bussiness, shows that our efforts to see orders executed with all possible speed, and with best class bulbs and plants **only**, are crowned with success.

To Firms with whom we had up to present no dealings we shall be glad to furnish them with such references which will give them sufficient confidence, that their orders if placed with us, are in good hands. In recommending our bulbs to the **Wholesale Trade** we wish to assure our customers that they will be well pleased when receiving our goods.

No doubt we have put our prices so that in most cases you will find them correct. Should you however have a lower offer from an other reliable Dutch House, we shall be glad to be informed, and we promise to do all what is possible to meet you.

Lisse as you may be aware is now the leading center of the Bulb Trade.

Trusting we may be favored with a continuance of your esteemed commands.

Yours respectfully,

J. J. GRULLEMANS & SONS.

---

## COMPLAINTS.

No complaints can be entertained unless made on **receipt** of the goods, and we can not take any responsibility as to their flowering as so much depends upon their treatment, but every precaution is taken to sent nothing but first sized well matured bulbs such as will under ordinary circumstances produce the very finest flowers and give the utmost satisfaction.

Early orders are respectfully solicited.

---

## Special terms of payement.

To parties with satisfactory references we allow Credit until the 1<sup>st</sup> of March 1910.

If longer Credit is required, please say so when ordering. In case we do not consider a customer trustworthy for ordinary credit we can demand payement at any time.

### ACCOUNTS, PAID WITHIN.

1 month from date of invoice are entitled to 5<sup>0</sup>/<sub>0</sub> discount.

2 months " " " " " " " " 4<sup>0</sup>/<sub>0</sub> "

3 " " " " " " " " 3<sup>0</sup>/<sub>0</sub> "

 *Accounts not paid within 12 months after date of invoice will then be drawn against atsight.*

*Orders from unknown correspondents must be accompanied by satisfactory references or one-half the amount of bill. Balance of amount to be paid on arrival of gcods, such payments are subjected to 5<sup>0</sup>/<sub>0</sub> discount on the full amount of the account.*

---

## Terms.

1. **Prices** are quoted nett and subject to market fluctuations.
  2. **All goods** travel at purchaser's risk and expense from sellers' stores.
  3. **Unless** contrary orders are given, insurance will be provided for at purchaser's costs.
  4. **Packing** and cases will be charged at cost price.
  5. **J. J. Grullemans & Sons** give no warranty, express or implied, and will not be in any way responsible for the results of planting or forcing of any bulbs and roots they send out: they guarantee all varieties to be true to name and description.
  6. **If at the time** of shipment the buyer has not yet settled his last year's account, sellers reserve to themselves a right to cancel all arrangements for new transactions.
  7. **By placing orders**, buyers are considered to agree with these terms, even if they differ from the laws of their country.

Pace	<b>Mixed all colors</b> . . . . . p. 10,000	30.—	—35	3.20	

All Parrot tulips quaranted true to name.

## Parrot Tulip. = Sensation.

The most unique and rare Parrot Tulip of late, the flowers produced are of **immense size**, the petals never being smaller than **nine inches in length**. The color is that an ordinary Bybloom tulip, violet and yellowish white.

No wonder this tulip received on the **Temple Show** through its rarity, the greatest attention of all amateur tulip growers.

Price 5.50 each.

We must ask our customers to place their order for **Yellow Crocus** as early as possible.

The failure of the crop last season has reduced the stocks generally to a large extent, and are sure of being again very scarce this summer.

## NOTICE.

We again beg to draw the attention of our customers to our offer of **Helleboris Niger maximus** in this list. Being very large stockholders you can do no better than to favor us with your orders for same. Full satisfaction guaranted.

For offer see pag. 109—110.

Narcissus Bernardi.

Cable words.

This interesting section, beying natural Pyrenees Hybrids, between the wild Poëticus Narcissus and N. Abscissus and N. Variiformis, Mr. Peter Barr of London, proved the origin of these Narcissus on one of his journeys to the Pyrenees, where he found the parents of their hybrid in a wild state.

## Paeonia flowered Dahlia's.

### New Extra.

This new race of Dahlia's was in 1906 for the first time shown at a Royal Horticultural Meeting in London and created quite a sensation. The flowers are large and well expanded and of a most graceful form, and we surely do not say too much if we say they are the finest Dahlia's ever offered to the public.

**Queen Wilhelmina**, pure white, fine form, very floriferous.

**Prince Henry**, crimson red, strong grower, semi-double flowers, 1st class Certificate Amsterdam 1905.

**Glorie of Baarn**, light rose, double, very large flowers.

**Pius X**, creamy yellow, with salmon colored center, single flower with two rows of petals, very excentric.

**Hollandia**, bright rose, the flowers of this variety have very long stems, for cutblooms no better.

**Baron G. de Grancy**, creamy white, 1st class Certificate, very floriferous.

**Queen Emma**, very large flower, bright salmon color, shaded lilas, extra fine.

**Germania**, dark red, very large flowers a grand variety.

**Paul Kruger**, white flushed red, a vigorous grower.

**Dr. K. W. v. Gorkum**, white, shaded rose, compact plant, very good.

**King Leopold**, yellow changing to white, grows two yards high a grand variety.

**Solfaterre**, carminred with yellow base, highly recommended.

For delivery autumn 1909 strong clumps

—20 each, per 100 14.—

### New Varieties.

— 1908. —

**Empress Augusta Victoria**, **Hugo de Vries**, **Miss G. Dawson**, **Glory of Groenekan**, **Isadora Duncan**, **Th. Hornsfeld** and **La Riente**, strong clumps at —.60 each

Description of color of each variety, may be had on application.

## Gladiolus Hollandia.

### A new Brenchlyensis variety.

A free growing variety with flowerspikes rather longer than those of Gladiolus Brenchlyensis.

The flowers are large and well opened and of exceptionally good form, even the smaller bulbs often produce from 30 to 40 flowers on a single spike.

The salmon shade rose color, makes it very distinct and delicate.

Planted in open ground, it is sure to give satisfaction, while as cutflower it is certain to find a ready sale.

per 100 \$ 1.60 per 1000 \$ 14.—

### Iris Alata or Scorpioides.

**Strong forcing bulbs, extra selected.** . . . . . 1.30    11.—  
" " " all flowering . . . . . 1.—    9.—

For early forcing no better, it blooms with us in the open ground in January so that no one will find it difficult to have it in bloom at the begin of December or even earlier. Treatment the same as given to tulips.

Flowers are of a lovely deep sky blue color, with a few light and dark spots in the center of the bloom. Where other Irissus are not to be had at that time of the year it should proof to be of great value as a outflower. As a pot plant, we advice to place 3 bulbs in each and when forced in this way they will proof to be of great value to flowershops.

### **Iris filifolia.**

A grand variety for early forcing color beautiful sky-blue large and substantial flowers on strong stems. Height about 1½ to 2 feet.

Every grower who forces Iris should try it. Flowers three weeks earlier than all other spanish Iris.

Price per 100 1.40; per 1000 12. —; per 10,000 100 —

# IRIS

## NOVELTIES 1907.

Flower of a Regelio-Cyclus Iris.

### Regelio-Cyclus (onco-Regelia) Iris.

Awarded on the different London shows with first class  
Certificates and Awards of merit.

This beautiful new race of Iris, flowers and cultivates with great easiness, comparing with the Oncoeyclus Iris (Iberica, Lorteti etc.) who are most difficult to cultivate. The flowers are of the same size of ordinary Oncoeyclus, and of satiny white, rose, braunish or violet ground, and are veined black. The flower-stems are strong and of good length, and carry generally three to four flowers, while from three to four flowerstems on a plant may be expected.

	each \$ ct.
<b>Arkadie</b> , purplish red veined brown on a white ground . . . . .	1.—
<b>Castor</b> , ruby red veined bronze. . . . .	— .60

**NOTICE.**

The Dutch forcing crowns we guarantee to give the greatest satisfaction but they should be forced **after** January.

We must advise our customers, to order early and to lay the crowns immediately in, the roots well covered, leaving the crowns fully exposed to the air, so, that the frost can freely reach them.

The flower after this treatment will be equal in size and quality to those produced by the best German or Berlin Crowns.

**Convalaria Fortin Clumps.****Per 100 10.—.**

We offer the above for as long as unsold, having only a limited quantity to offer. Although the price is rather high no grower will feel sorry to have paid this extra money, for one must first have seen a clump of these in bloom to be convinced what a tremendous difference there is between these and a clump of the ordinary old Dutch variety.

**Only a limited quantity to offer.****Marica, (Aug.-Oct.)**

### Montbretsia Speciosa.

The **Montbretsia** which we are sure will be one of the leading varieties in the future, color bright orange red, on very strong stems. We dare say there is even amongst the more expensive varieties **no better**. If cut and placed in water flowers will last over a fortnight.

Having before we offered it to the trade, cultivated a large stock of this grand variety, we are now in a position to offer it very reasonable.

**Price per 100 —.40 per 1000 3.— per 10.000 28.—**

DUTCH BULBS

OFFERED FOR SALE BY

*J. J. Grullemans & S<sup>ons</sup>,*

West-End-Nurseries

ESTABL. 1854.

LISSE-HOLLAND.

---

PRINTED BY MULDER, LEIDEN (HOLLAND).

*Gentlemen,*

We have much pleasure in tendering you our Bulb-Book for 1910, the **largest** and **most complete** issued by any Dutch Firm.

Our yearly growing business, shows that our efforts to see orders executed with all possible speed, and with best class bulbs and plants **only**, are crowned with success.

As to firms, we did not yet deal with, we shall be glad to furnish with such references as will give them sufficient confidence, that their orders if placed with us, are in good hands. In recommending our bulbs to the **Wholesale Trade** we wish to assure our friends that they will be well pleased when receiving our goods.

We have put our prices so that in most cases you will find them correct. Should you however have a lower offer from any other reliable Dutch House, we shall be glad to be informed, and we promise to do all what is possible to meet you.

Lisse as you may be aware is now the leading centre of the Bulb Trade.

Trusting we may be favored with a continuance of your esteemed commands.

Yours respectfully,

J. J. GRULLEMANS & SONS.

---

## COMPLAINTS.

No complaints can be entertained unless made on **receipt** of the goods, and we can not take any responsibility as to their flowering which greatly depends upon their treatment, but every precaution is taken to send nothing but first sized well matured bulbs such as will under ordinary circumstances produce the very finest flowers and give the utmost satisfaction.

**Early orders are respectfully solicited.**

---

# Special terms of payment.

All accounts are payable on delivery of goods.

In ordinary cases however payment will not be required until 1st March following delivery, but an account must be paid forthwith should Messrs. Grullemans & Sons deem it necessary to demand immediate payment.

## ACCOUNTS, PAID WITHIN.

1 month from date of invoice are entitled to 5<sup>0</sup>/<sub>10</sub> discount.

2 months " " " " " " " " 4<sup>0</sup>/<sub>10</sub> "

3 " " " " " " " " 3<sup>0</sup>/<sub>10</sub> "

 *Accounts not paid within 12 months after date of invoice will be disposed of by draft at sight.*

*Orders from unknown correspondents must be accompanied by satisfactory references or one-half the amount of bill. Balance of amount to be paid on arrival of goods, for which 5<sup>0</sup>/<sub>10</sub> discount on the full amount of account is allowed.*

---

## Terms.

1. **Prices** are quoted nett and subject to market fluctuations.
  2. **All goods** travel at purchaser's risk and expense from sellers' stores.
  3. **Unless** directions to the contrary are given, insurance will be provided for at purchaser's costs.
  4. **Packing** and cases will be charged at cost price.
  5. **J. J. Grullemans & Sons** give no warranty, express or implied, and will not be in any way responsible for the results of planting or forcing of any bulbs and roots they send out: they guarantee all varieties to be true to name and description.
  6. **If at the time** of shipment the buyer has not yet settled his last year's account, sellers reserve to themselves a right to cancel all arrangements for new transactions.
  7. **By placing orders**, buyers are considered to agree with those terms, even if they differ from the laws of their country.
-

Pace	<b>Mixed all colors</b> . . . . .	per 10.000	27.60	— .50	3. —

All Parrot tulips guaranteed true to name.

## Parrot Tulips. = Sensation.

The most unique and rare Parrot Tulip of the recent time, flowers produced are of **immense size**, petals never being smaller **than nine inches in length**. The color is that of an ordinary Bybloom tulip, violet and yellowish white.

No wonder this tulip received on the **Temple Show** through its rarity, the greatest attention of all amateur tulip growers.

Price 6.— each.

**Paeonia flowered Dahlia's.**p. 100,  
S. cl.

This new race of Dahlia's was in 1906 for the first time shown at a Royal Horticultural Meeting in London and created quite a sensation. The flowers are large and well expanded and of a most graceful form, and we surely do not exaggerate when saying they are the finest Dahlia's ever offered to the public.

<b>Andrew Carnegie</b> (1908). Different from the others in form and habit, strong stems. Very useful for decorative work. Colour salmon pink with bronze shading. 4 feet . . . . .	19.20
<b>Baron G. de Grancy</b> (1906). Beautiful habit, flowers on long stems rising above the foliage, white colour; floriferous. 5 feet . . . . .	10.80
<b>Bertha von Suttner</b> (1908). Blush mauve with a rosy salmon tint. Of compact and sturdy growth and very floriferous. Flowers often measuring 8 inches in diameter. 3½ feet. . . . .	19.20
<b>Dr. K. W. v. Gorkum</b> (1906). Blush white very large pointed petalled flowers. 5 feet. . . . .	10.80
<b>Duke Henry</b> (1906). Large purple crimson, very decorative, 5 feet . . . . .	10.80
<b>Geisha</b> (1908). A wonderful scarlet and yellow flower, a variety of great merit. 5 feet . . . . .	19.20
<b>Germania</b> (1908). Bright glowing crimson, very attractive, 3 feet . . . . .	10.80
<b>Glory of Baarn</b> (1906). Large flowers of a light rosy tint, 4 feet . . . . .	10.80
<b>Glory of Groenekan</b> (1907). Extra large flower; orange yellow. 4 feet . . . . .	9.60
<b>H. Hornsveld</b> (1907). Enormous large flowers of very elegant form, soft salmon color. 4 feet . . . . .	9.60
<b>Hugo de Vries</b> (1907). A dwarf variety, orange buff flowers, strong stems, typical form. 3 feet. . . . .	9.60
<b>Kaiserin Augusta Victoria</b> (1907). Primrose colour, bright flower. 3 feet . . . . .	9.60
<b>King Edward</b> (1908). Large flower. Purple crimson, quite distinct. 6 feet . . . . .	24.—
<b>King Leopold</b> (1906). The best yellow colour, varying from cream yellow to white. Flowers very large and on long stems. 5 feet. . . . .	12.50
<b>La Riente</b> (1907). Nice flowers, long and strong stems, pink 4 feet . . . . .	10.80
<b>Mannheim</b> (1908). Very fine form on long strong stems; orange soft stone red. 6 feet. . . . .	19.20
<b>Merveille</b> (1907). Rosy salmon, nice form. 4¼ feet . . . . .	10.80
<b>P. W. Jansen</b> (1907). Rosy salmon with a dash of yellow. 5½ feet . . . . .	12.50
<b>Queen Alexandra</b> (1908). Elegant flower. Sulphur and white. 4 feet . . . . .	24.—

We can especially recommend this *Galanthus* for shop sale, even if kept in bags until the end of November there is hardly any loss in bulbs, whereas, it is sufficiently known, the old variety often gives a loss of 25 percent.

**Please Note.** We must inform our friends that we can supply home grown *Galanthus Elwesi* this season finest quality, bulbs generally having the size of small *Narcissus*. Kindly ask for quotation and samples in due time, which are to be had postfree on application in July. Stock at least half a million.

## Gladiolus Hollandia.

### A new Brenchlyensis variety.

A free growing variety with flowerspikes rather longer than those of Gladiolus Brenchlyensis.

The flowers are large and well opened and of exceptionally good form, even the smaller bulbs often produce **from 30 to 40 flowers on a single spike.**

The salmon shade rose color, makes it very distinct and delicate.

Planted in open ground, it is sure to give satisfaction and as cutflower it is certain to find a ready sale.

## Bulbous Iris. (Aug.-Nov.)

Cable words.

p. 100.    p. 1000.  
\$ ct.      \$ ct.

### Iris Alata or Scorpioides.

Strong forcing bulbs, extra selected . . . . .	1.20	9.60
" " " all flowering . . . . .	1.—	8.40

For early forcing no better, here it blooms in the open ground in January so that no one will find it difficult to have it in bloom at the begin of December or even earlier. Treatment the same as given to tulips.

Flowers are of a lovely deep sky blue color, with a few light and dark spots in the centre. As other Irissus are not to be had at that time of the year it apparently seems to be of great value for cutflower. As a pot plant, we advice to place 3 bulbs in each and when forced in this way they will be very suitable for flowershops.

<b>alata alba</b> . . . . .	each	— .60

# IRIS.

## NOVELTIES 1907.

Flower of a Regelio-Cyclus Iris.

### Regelio-Cyclus (onco-Regelia) Iris.

Awarded on the different London shows with first class

Certificates and Awards of merit.

This beautiful new race of Iris, flowers and cultivates with great easiness, compared to the Oncocyclus Iris (Iberica, Lorteti etc.) who are most difficult to cultivate. The flowers are of the same size as ordinary Oncocyclus, and of satiny white, rose, brownish or violet ground, and are veined black. The flower-stems are strong and of good length, and generally bear from three to four flowers, whereas an equal number of flowerstems on the plant may be expected.

	each. \$ ct.
<b>Arkadie</b> , purplish red, veined brown on a white ground . . . . .	1.10
<b>Castor</b> , ruby red, veined bronze . . . . .	— .75
<b>Charon</b> , F. C. Certificate London May 17, '04. Color dark brown, veined black, extra . . . . .	1.—
<b>Eurydice</b> , Grand variety, with lila rose flowers, drooping petals on a lilas ground, veined dark violet . . . . .	1 20
<b>Flora</b> , very floriferous rose, tinted brown . . . . .	— .60
<b>Hebe</b> , Free flowering variety, with dark indigo-blue blooms on a silvery netted ground. . . . .	— .60
<b>Hecate</b> , From this beautiful variety the upper petals are soft rosy white, the lower petals on a silvery ground are veined brown and bronze, extra . . . . .	— .60
<b>Hera</b> , strong grower with flowers of a beautiful ruby red color, bronze blue shaded . . . . .	— .50
<b>Hesperia</b> , Very large petals, lower part of flower silvery white, veined chocolate brown, very delicate, extra . . . . .	— .60
<b>Iphigenia</b> , F. C. Certificate London May 17, '04. Grand velvety purple blooms of which the lower part of the petals are greish white, spotted brown . . . . .	1.20
<b>Ises</b> , Award of merit London May 17, '04. Very large, with grand flowers of a rubyred selfcolor with gray and purple veins, easily grown. This variety may be called one of the most beautiful of this new race . . . . .	— .60
<b>Jocaste</b> , silvery white ground, veined black, tinted lovely lilas . . . . .	— .75
<b>Juno</b> , silvery ground, veined brownish black, tinted brown. 1st class certificate show Amsterdam 1905 . . . . .	1.—
<b>Laos</b> , vigorous grower, flowers silvery white, veined deep purple blue . . . . .	— .75
<b>Milo</b> , flowers golden bronze, veined brown . . . . .	1.10
<b>Oberon</b> , light blue, veined white, perfect flowers . . . . .	— .75
<b>Pallas</b> , deep blue, spotted black, veined brown . . . . .	— .75
<b>Persephone</b> , Award of merit London 15th of May 1907. The largest flowering variety of this kind Flowers silvery white ground, veined purple-blue, splendid . . . . .	1.80
<b>Pluto</b> , violet purple, veined brown, extra . . . . .	1.10
<b>Pollux</b> , light silvery white, veined violet purple spot. 1st class Certificate Amsterdam 1905 . . . . .	— .75
<b>Psyche</b> , Award of merit London May 17, '04. Flowers are on silvery white ground, veined brown, a superb variety, highly recommended . . . . .	— .75
<b>Sirona</b> , Dark lilas violet, with short but broad petals which on a greyish white ground are blackish veined. Each petal bears a black spot in the middle . . . . .	— .60
<b>Thetis</b> , Something like <b>Charon</b> with strong upholding flowerpetals. The lower petals are mahogany veined brown and spotted on a yellowish ground . . . . .	1.—

**NOTICE.**

The Dutch forcing crowns we guarantee to give the greatest satisfaction but they should be forced **after** January.

We must advice our customers, to order early and to lay the crowns immediately in, the roots well covered, leaving the crowns fully exposed to the air, so, that the frost can freely reach them.

The flower after this treatment will be equal in size and quality to those produced by the best German or Berlin Crowns.

**Convalaria Fortin Clumps.****Per 100 9.60.**

We offer the above for as long as unsold, having only a limited quantity to offer. Although the price is rather high no grower will regret to have paid this extra money, for one must first have seen a clump of these in bloom to be convinced what an enormous difference there is between these and a clump of the ordinary old Dutch variety.

**Only a restricted quantity to offer.****Littonia.** (Oct.-March.)

**modesta Keiti**, splendid orange flowers . . . . . 8.40

**Montbretsia Speciosa.**

This **Montbretsia** we are sure is now one of the leading varieties color bright orange red, on very strong stems. We may say there is even amongst the more expensive varieties **no better**. In a cut-state they remain constant for a fortnight and over.

Having cultivated a large stock of this variety, before tendering it to the trade, we are now in a position to offer it very reasonable.

**Price per 100 —.40 per 1000 3.15 per 10.000 27.60**

The lack of this article increasing every year, our customers would oblige  
to place their order early.

**SCILLA.**

**Great Novelty 1908.**

**Scilla Cilicicus.**

With much pleasure and confidence we can recommend our friends to place a trial order for Scilla Cilicicus with us.

Flowering with great abundance and with flowers of the most beautiful blue color imaginable, it is sure to give the highest satisfaction, may be forced in the ordinary way, but flowers much earlier than Scilla Siberica.

Flowers also being of more stability it will soon supplant the old Scilla Siberica from the market. We can offer as follows:

Extra selected bulbs p. 100	1.45	p. 1000	12 —	p. 10.000	91.20

## Spiraea. (Oct.-April.)

### Two grand Novelties.

Both these varieties force readily, and are quite hardy, thriving best in a moist position. The growth is similar to the old *Spiraea Japonica* both the flowers are of a beautiful shade of pink. When used in combination with any of the white flowered varieties the decorative effect is most pleasing. We can offer strong cultivated clumps ready for forcing as follows.

**Queen Alexandra**, a very bright pleasing shade of pink . . . . . p. 100. 12.—  
**Peach Blossom**, a light pink exceedingly pretty . . . . . 10 80

Please order early to prevent disappointment.

CATALOGUE  
OF  
DUTCH BULBS

OFFERED FOR SALE BY

*J. J. Grullemans & Sons,*

West-End-Nurseries

ESTABL. 1854.

LISSE-HOLLAND.

---

PRINTED BY MULDER, LEYDEN (HOLLAND).

*Gentlemen,*

We have much pleasure in presenting for your kind perusal our Bulb-Book for 1910, the **largest** and **most complete** issued by any Dutch Firm.

The continued increase in our business, shows that our efforts to have orders executed with all possible speed, and with best class bulbs and plants **only**, are crowned with success.

As to Firms, we did not yet deal with, we shall be glad to furnish them with such references as will give them sufficient confidence, that their orders, if placed with us, are in good hands.

Recommending our bulbs to the **Wholesale Trade** we wish to assure our friends that they will be thoroughly gratified when receiving our goods.

We have put our prices so that in most cases you will find them correct. Should you however have a lower offer from any other reliable Dutch House, we shall be glad to be informed, and we promise to do all in our power to meet you.

Lisse, as you may be aware, is now the leading centre of the Bulb-Trade.

Trusting we may be favored with a continuance of your esteemed commands.

Yours respectfully,

J. J. GRULLEMANS & SONS.

---

## COMPLAINTS.

No complaints can be entertained unless made on **receipt** of the goods, and we cannot take any responsibility as to their flowering which greatly depends upon their treatment, but every precaution is taken to send nothing but first sized well matured bulbs such as will under ordinary circumstances produce the very finest flowers and give the utmost satisfaction.

**Early orders are respectfully solicited.**

# Special terms of payment.

All accounts are payable on delivery of goods.

In ordinary cases however payment will not be required until 1st March following delivery, but an account must be paid forthwith should Messrs. J. J. Grullemans & Sons deem it necessary to demand immediate payment.

## ACCOUNTS, PAID WITHIN.

1 month from date of invoice are entitled to 5% discount.

2 months " " " " " " " " 4% " "

3 " " " " " " " " 3% " "

 *Accounts not paid within 12 months after date of invoice will be disposed of by draft at sight.*

*Orders from unknown correspondents must be accompanied by satisfactory references or one-half the amount of bill. Balance of amount to be paid on arrival of goods, for which 5% discounts on the full amount is allowed.*

## Terms.

1. **Prices** are quoted nett and subject to market fluctuations.
2. **All goods** travel at purchaser's risk and expense from sellers's stores.
3. **Unless** directions to the contrary are given, insurance will be provided at purchaser's costs.
4. **Packing** and cases will be charged at cost-price.
5. **J. J. Grullemans & Sons** give no warranty, express or implied, and will not be in any way responsible for the results of planting or forcing of any bulbs and roots they send out: they guarantee all varieties to be true to name and description.
6. **If at the time** of shipment the buyer has not yet settled his last year's account, sellers reserve to themselves a right to cancel all arrangements for new transactions.
7. **By placing orders**, buyers are considered to agree with those terms, even if they differ from the laws of their country.

### Mr. ROOSEVELT's visit at the Haarlem Flower show.

We are proud to say that when Mr. ROOSEVELT visited our groups he took particularly good notice of our exhibit and left it — with the words — very beautiful indeed — it is all the more appreciated by us because ours and one or two other exhibits were the only ones which seemed to have drawn his attention.

#### PARTLY VIEW OF OUR EXHIBIT AT THE HAARLEM SHOW.

Silver Gilt Medal, the only medal awarded for Named Hyacinths 1st size. — Gold Medal for best single early Tulips. — Gold Medal offered by the Provincial States of Zealand for the best Tulips on the Show. — Gold Medal for the best group of Narcissus. — Silver Gilt Medal for the best group of Miscellaneous bulbs. — Silver Gilt Medal for the best group of Darwin tulips.

Our group of miscellaneous bulbs for which we were awarded the SILVER GILT MEDAL  
Haarlem Show 1910.

				5.50

All Parrot tulips guaranteed true to name.

## Parrots Tulips. = Sensation.

The most unique and rare Parrot Tulip of recent time, flowers are of immense size, petals never being smaller than nine inches in length.

Color equal to the ordinary Bybloom tulip, violet and yellowish white. No wonder this tulip received on the **Temple Show** through its rarity, the greatest attention of all amateur tulip growers.

Price 8.50 each.

## Paeonia flowered Dahlia's.

Cable words.

p. 100  
\$ ct.

This new race of Dahlia's was in 1906 firstly shown at a Royal Horticultural Meeting in London and created quite a sensation. The flowers are large and well expanded and of a most graceful form, and we surely do not exaggerate by saying they are the finest Dahlia's ever offered.

<b>Andrew Carnegie</b> (1908). Different from the others in form and habit, strong stems. Very useful for decorative work. Color salmon pink with bronze shading, height 4 feet . . . . .	18 -
<b>Baron G. de Grancy</b> (1906). Beautiful habit, flowers on long stems rising above the foliage, white color; floriferous. height 5 feet . .	9.60
<b>Bertha von Suttner</b> (1908). Blush mauve with a rosy salmon tint. Of compact and sturdy growth and very floriferous. Flowers often measuring 8 inches in diameter. height 3½ feet . . . . .	18.—
<b>Dr. K. W. van Gorkum</b> (1906). Blush white very large pointed flowers height 5 feet . . . . .	9.60
<b>Duke Henry</b> (1906) Large purple crimson, very decorative, height 5 feet	9.60
<b>Geisha</b> (1908). A wonderful scarlet and yellow flower, a variety of great merit height 5 feet. . . . .	18.—
<b>Germania</b> (1908) Bright glowing crimson, very attractive. height 3 feet	9.60
<b>Glory of Baarn</b> (1906). Large flowers of a light rosy tint, height 4 feet	9.60
<b>Glory of Groenekan</b> (1907). Extra large flower, orange yellow. height 4 feet . . . . .	9.60
<b>Hollandia</b> , bright rose. . . . .	13.20
<b>H. Hornsveld</b> (1907). Enormous large flowers of very elegant form, soft salmon color. height 4 feet . . . . .	9.60
<b>Hugo de Vries</b> (1907). A dwarf variety, orange buff flowers, strong stems, typical form. height 3 feet. . . . .	9.60
<b>Kaiserin Augusta Victoria</b> (1907). Primrose color, bright flower. height 3 feet . . . . .	9.60
<b>King Edward</b> (1908). Large flower. Purple crimson, quite distinct. height 6 feet . . . . .	25.—
<b>King Leopold</b> (1906). The best yellow color, varying from cream yellow to white. Flowers very large and on long stems. height 5 feet	9.60
<b>La Riante</b> (1907). Nice flowers, long and strong stems, pink height 4 feet.	9.60
<b>Mannheim</b> (1908). Very fine form on long strong stems; orange shaded soft stone red. height 6 feet. . . . .	18 —
<b>Merveille</b> (1907). Rosy salmon, nice form. height 4¼ feet . . . . .	9.60
<b>P. W. Jansen</b> (1907). Rosy salmon with a dash of yellow. height 5½ feet.	9.60
<b>Queen Alexandra</b> (1908). Elegant flower. Sulphur and white height 4 feet . . . . .	21.60
<b>Queen Emma</b> (1906). Rosy pink flowers, suffused with yellow and white. height 6 feet . . . . .	9.60
<b>Queen Wilhelmina</b> (1906). Pure white, elegant form; floriferous. height 4 feet . . . . .	9.60
<b>Sneeuwwitje (Snowqueen)</b> (1907). Pure white, strong grower height 4 feet . . . . .	9.60
<b>Solfaterre</b> , scarlet yellow center. . . . .	12.—
<b>Mixed varieties</b> (incl. 10 var.). . . . .	8.70

Modest

**Gladiolus Hollandia.****A new Brechlyensis variety.**

A free flowering variety with spikes rather longer than those of *Gladiolus Brechlyensis*.

The flowers are large and well opened and of exceptional good form, even the smaller bulbs often produce **from 30 to 40 flowers on a single spike.**

The salmon shaded rose color, makes it very distinct and delicate.

Planted in open ground, it is sure to give satisfaction, while as a cutflower it is certain to find a ready sale.

per 100 \$ 1.35 per 1000 \$ 12.— per 10,000 \$ 115.—

**Hybrids of Gandavensis.****Novelty 1908.**

**Miss Kitty Grullemans**, each \$ —.25 per dozen \$ 2.20

This *Gladiolus* can be looked upon as the finest yet raised, it grows with remarkable vigor and flowers with a freedom that is sure to give satisfaction to all.

The tremendous size of deep purple flowers which are very brilliant and striking are unsurpassed.

Modern

**Strong forcing bulbs**, extra selected . . . . . 1.—

7.50

„ „ „ all flowering . . . . . —.90

6.—

For early forcing no better, it blooms here in the open ground in January so that no one will find it difficult to have it in bloom beginning of December or even earlier. Treatment the same as given to tulips.

Flowers are of a lovely deep sky blue color, with a few light and dark spots in the center of the bloom. As other *Irissus* are not to be had at that time of the year it should prove very profitable for cutflower. As a pot plant, we advise to place 3 bulbs in each and when forced in this way they will be of great value to flowershops.

# DUTCH IRIS.

A NEW AND EARLY RACE.

This new strain has been created by the crossing of Xiphiums, such as *filifolia*, *tingitana*, *Buritanian*, *Boissieri* and other early flowering varieties. It has entirely been cultivated in Holland and therefore the name of **Dutch Iris** is fully justified.

The flowers are a good deal larger than those of the ordinary Spanish Iris and characterised by wide faces covered with very conspicuous orange blotches. The prevailing tone of colour is that of the gentle shades which we meet with *Coquette des Blanches* (*Louise*) and *La Tendresse*.

Curiously there are but a few yellows amongst them, so that the stock of those is at present still restricted. The great value of those Irises is their **earliness**.

They are at least a fortnight earlier than the Spanish Irises. They will fill up the awkward gap after the tulips, and for this reason will be welcome additions to the herbaceous feature.

# NOVELTIES.

Flower of a Regelio-Cyclus Iris.

## **Regelio=Cyclus (onco-Regelia) Iris.**

Awarded on the different London shows with first class Certificates  
and Awards of merit.

This beautiful new race of Iris, flowers and cultivates with great easiness, compared with the Oncocyclus Iris (Iberica, Lorteti etc.) who are most difficult to cultivate. Flowers are of the same size as ordinary Oncocyclus, with satiny white, rose, brownish or violet ground, and are veined black. Flowerstems are strong and of good length, and carry generally three to four flowers, while from three to four flowerstems on a plant may be expected.

**NOTICE.**

The Dutch forcing crowns we guarantee to give the greatest satisfaction when forced **after** January.

We must advise our customers, to order early and to lay the crowns immediately in, roots well covered, leaving the crowns fully exposed to the air, so that the frost can freely reach them.

The flower after this treatment will be equal in size and quality to those produced by the best German or Berlin Crowns.

### Montbretsia Speciosa.

This **Montbretsia** we are sure is now one of the leading varieties color bright orange red, on very strong stems. We dare say there is even amongst the more expensive varieties **no better**. In a cut-state they remain constant for over a fortnight.

Before offering it to the trade we cultivated a large stock of this grand variety, and are now in a position to quote it very reasonable.

**Price per 100 \$ - .60 per 1000 \$ 5.— per 10.000 \$ 36.—**

## SCILLA.

### Great Novelty 1908.

### Scilla Cilicicus.

With much pleasure and confidence we can recommend our friends to place a trial order for Scilla Cilicicus with us.

Flowering with great abundance and with flowers of the most beautiful blue color imaginable, it is sure to give the highest satisfaction, may be forced in the ordinary way, but blooms much earlier than Scilla Siberica.

Through the precocity and constancy of the flowers it will soon push the old Scilla Siberica off the market. We can offer as follows:

Extra selected bulbs	per 100	1.50	per 1000	12. —	per 10,000	91.50
"    first size "	" "	1. —	" "	7.20	" "	67.50
Ordinary " " "	" "	— .75	" "	6.25	" "	48. —
Early orders solicited.

## Spiraea. (Oct.-April.)

### Two grand Novelties.

Both these varieties force readily, and are quite hardy, thriving best in a moist position. The growth is similar to the old *Spirea Japonica* but the flowers are of a beautiful shade of pink. When used in combination with any of the white flowered varieties the decorative effect is most pleasing. We can offer strong cultivated clumps ready for forcing as follows.

Oint		p. 100
Oker	<i>Queen Alexandra</i> , a very bright pleasing shade of pink . . . . .	10.—
	<i>Peach Blossom</i> , a light pink exceedingly pretty . . . . .	10.—

Please order early to prevent disappointment.

Crocus and various bulbous flowers.**

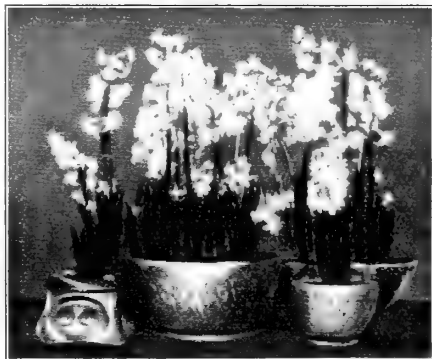

**(size 12/15 inches) per doz. \$ 3.— per 100 \$ 21.— nett cash.**

These plates being perfectly true to nature both regarding size of the flowers and colors, will be found of great value for framing up in the shop or as reference on the counter during the autumn and spring sale. Postage extra —.60 per dozen plates. — No less than one dozen plates can be supplied at this rate.

**In ordering please state varieties preferred.**

Tulips Growing in fibre.

Roman Hyacinths growing in fibre.

Narcissus growing in fibre

The growth of bulbs in Fibre, in china vases or bowls **without Drainage.**

The best and most charming way of growing spring bulbs for house and table decoration.

The wonderful success we have achieved in growing bulbs, such as Roman Hyacinths, Paper whites, Dutch Hyacinths, Tulips and Narcissus in our special fibre, using china vases **without drainage**, proves, that it is not only a most charming and effective method of growing bulbs for those who have neither a large garden, the conveniences of greenhouses, or frames, nor have a difficulty in obtaining suitable soil, but that it is also one which we feel sure is being, and will be, much more extensively adopted in the future when it is fully realised what can be done in this way.

The advantage of this system is, that the vases can be placed any where about the house, in the drawing-room or dining-room, without fear of any mess from water or soil coming through the base of pots. The Fibre is perfectly odourless, and clean to handle. It is specially and carefully prepared by ourselves for this purpose and we strongly recommend all our correspondents to try a few various bulbs in this way if they have not yet done so.

The bulbs are potted the same way as in ordinary soil just showing their tops. It is **not necessary** or **desirable** to press the fibre **tightly**, otherwise the roots do not work freely, and bulbs have a tendency to push themselves upwards. Once potted, they require hardly any attention, only **great** care should be taken to keep the compost moist, but on no account must it be **sodden or too wet**.

If **once** allowed to become dry, even for half a day only, the pores of the roots close up and the bulbs in many cases go blind and are ruined. This happens more frequently with Tulips than Narcissus, the tulip roots being finer and therefore more liable to injury.

When the bulbs have been potted, vases or jars should be kept in a **dark** airy cellar or room, nothing is worse than a confined cupboard or a small, airless dark room.

When the bulbs have grown about one inch, they should be brought into more light, and the vases or bowls can be placed in the window during the day, taking care, of course, to keep them from frost. **All** bulbs can be grown in fibre but in Hyacinths we have a special size which is best for this way of cultivation.

We are offering ten distinct shades at \$ 35.— per 1000. Miniature Hyacinths grow freely and look very nice in bowls, mixed colors should never be used as they come to uneven.

The fibre is carefully mixed and packed by ourselves and shipped dry so as to cost as little freight as possible.

A case containing about 15 bushels costs \$ 3.— a smaller size containing about 7 bushels is charged \$ 2.— for. Prices subjected to 5% discount for cash, no charge for packing.

P. S. Some of our rivals are using coconut fibre for this kind of cultivation, but this does not by any means give the same satisfaction, our fibre being the original plant fibre and therefore far superior to this imitation.

1912.

WHOLESALE ONLY.

CATALOGUE

OF

DUTCH BULBS AND PLANTS

OFFERED FOR SALE BY

*J. J. Grullemans & Sons,*

West-End-Nurseries

ESTABL. 1854.

LISSE-HOLLAND.

---

*Gentlemen,*

We have much pleasure in presenting for your kind perusal our Bulb-Book for 1912, the **largest** and **most complete** issued by any Dutch Firm.

The continued increase in our business, prove that our efforts to have orders executed with all possible speed, and with best class bulbs and plants **only**, are successful.

As to Firms, we did not yet deal with, we shall be glad to furnish them with such references as will give them sufficient confidence, that their orders, if placed with us, are in good hands.

Recommending our bulbs to the **Wholesale Trade** we wish to assure our friends that they will be thoroughly gratified when receiving our goods.

We have put our prices so that in most cases you will find them correct. Should you however have a lower offer from any other reliable Dutch House, we shall be glad to be informed, and we promise to do all in our power to meet you.

Lisse, as you may be aware, is now the leading centre of the Bulb-Trade.

Trusting we may be favored with the continuance of your esteemed commands.

Yours respectfully,

J. J. GRULLEMANS & SONS.

---

## COMPLAINTS.

No complaints can be entertained unless made on **receipt** of the goods, and we cannot take any responsibility as to their flowering which greatly depends upon treatment, but every precaution is taken to send nothing but first-sized well-matured bulbs such as will under ordinary circumstances produce the very finest flowers and give the utmost satisfaction.

Early orders are respectfully solicited.

# Special terms of payment.

All accounts are payable on delivery of goods.

In ordinary cases however payment will not be required until 1st of March following delivery, but an account must be paid forthwith should Messrs. Grullemans & Sons deem it necessary to demand immediate payment.

## ACCOUNTS, PAID WITHIN.

1 month from date of invoice are entitled to 5% discount.

2 months „ „ „ „ „ „ „ 4% „

3 „ „ „ „ „ „ „ 3% „

 *Accounts not paid within 12 months after date of invoice will be disposed of by draft at sight.*

*Orders from unknown correspondents must be accompanied by satisfactory references or one-half the amount of bill. Balance of amount to be paid on arrival of goods, for which 5% discount on the full amount is allowed.*

## Terms.

1. **Prices** are quoted nett and subject to market fluctuations.
2. **All good** travel at purchaser's risk and expence from sellers' stores.
3. **Unless** directions to the contrary are given, insurance will be provided at purchaser's costs.
4. **Packing** and cases will be charged at cost-price.
5. **J. J. Grullemans & Sons** give no warranty, express or implied, and will not be in any way responsible for the results of planting or forcing of any bulbs and roots they send out; they guarantee all varieties to be true to name and description.
6. **If at the time** of shipment the buyer has not yet settled his last year's account, sellers reserve to themselves a right to cancel all arrangements for new transactions.
7. **By placing orders,** buyers are considered to agree with those terms, even if they differ from the laws of their country.

# NOTICE.

25 roots will be charged at 100 rate.

250 at 1000 rate.

Telegrams should be addressed:

**Grullemans, Lisse, Holland.**

If wiring, goods will leave with the next steamer from Rotterdam or Amsterdam.

## A new, rare, and meritorious Variety for 1912.

We can now offer a splendid novelty in double **Narcissus**, namely the

### Bicolor Horsfieldi flore plenum

a variety which we can recommend our friends with safety and confidence as exceptionally showy and distinct. Price, at present, may prevent a large sale, but if this comes down, we are sure it will take the lead amongst the double **Narcissus** as a cutflower.

Price per doz. \$ 2.— pr 100 \$ 18.—.

<b>INTRODUCTION</b> . . . . .	each 41.—

	<b>The Bride</b> , (New seedling) one of Mr. Barr's fine seedlings, broad snowwhite perianth of great substance, small brilliant red cup, a splendid flower of grand form, a variety which we can safely recommend . . . . . each	1.75	
	<b>Verbanensis</b> , very late, dwarf . . . . .	5	
	<b>Verus of Haworth</b> , late . . . . .	3.75	
	<b>Virgil</b> , very large white petals, very deep red cup each	1.—	

## Narcissus Nelsoni.

Lucern	<b>aurantius</b> , very fine . . . . .	6.—	
	<b>(Edenhof)</b> , white, yellow, extra fine, new . . . . .	3.—	24.—
	<b>Major</b> , perianth pure white, yellow cup . . . . .	1.25	11.—
	<b>Mrs Backhouse</b> , pure white petals, cup orange. . . . .	2.50	
	<b>Mrs Knight</b> . . . . .	17.—	
	<b>Resolute</b> , splendid variety. . . . .	18.—	
	<b>Strong bow</b> , petals strong and pure white, very large yellow cup. (Award of Merit Birmingham 1903. — R. H. S. 1903 Botanic Society 1904). . . . . each	—60	

## Tridymus.

Hybrids of Tazette X Ajax bearing generally two to three flowers on a stem, sweet scented.

Lucid	<b>A. Rawson</b> , perianth bold, clear yellow, cup full yellow, very handsome, height 14 inches . . . . . each	—60	
	<b>Clath of Gold</b> , best coloured of the Tridymus, each stem bears generally three to five flowers, yellow perianth golden cup. . . . . each	—40	22.—
	<b>E. H. Krelage</b> , perianth yellow, cup dark golden yellow . . . . .	—60	
	<b>Miss White L. X P.</b> , clear silvery white flowers, each stem bears generally three to four elegant flowers . . . . .	7.50	
	<b>Mrs. Alfred Pearson L. X P.</b> . . . . .	12.—	
Lucifer	<b>Mrs Harry Veitch</b> , large white perianth, broad yellow cup, late . . . . . each	—60	
	<b>St. Patrick</b> , robust grower and free bloomer, flowers are large: cup rich gold yellow, perianth soft yellow . . . . .	6.—	
	<b>St. Peter</b> , perianth apricot with golden yellow crown each	—25	
	<b>S. A. de Graaff</b> , fine yellow cup, large and fine imbricated flowers, perianth silvery white . . . . .	4.50	
Lucina	<b>The Twins</b> , twoflowered variety, very pretty, perianth white, cup beautiful yellow, sweet scented, cultivates very easily . . . . .	6.—	

## Narcissus Poetaz.

Cable words.

p. 100    p. 1000  
\$ ct.    \$ ct.

A new race of Narcissus, resulting from a cross between Poëticus Ornatus and the best varieties of Polyanthus Narcissus. The plants grow very vigorously and bear generally from three to four flowers on a stem and are deliciously fragrant.

Luck	<b>Alsace</b> , pure white, yellow eye, flowers generally with 3 blooms on a stem . . . . .	2.—	18.—
Luckless	<b>Aspacia</b> , strong grower, flowers generally 3 to 4 flowers on a stem . . . . .	1.75	17.—
Lucky	<b>Elvira</b> , broad white petals of great substance and golden yellow cup, edged orange, height 24 inches. Award of merit R. H. S. April 1904 . . . . .	1.75	17.—
Lucre	<b>Ideal</b> , a fine showy variety, bearing five to six flowers on a stem, perianth white, cup brilliant orange, height 21 inches . . . . .	3.—	
Luctual	<b>Irene</b> , flowers generally with five to six flowers of pale primrose perianth and deep golden yellow cup, prettily fluted height 20 inches . . . . .	3.—	
Ludent	<b>Jaune à Merveille</b> , a splendid variety with four to six flowers on a stem, primrose perianth, bright yellow cup, edged orange, a splendid variety. . . . . each —.75		
Luez	<b>Klondyke</b> , deep yellow, from 6 to 7 blooms on a stem . . . . .	5.—	
Luff	<b>Louise</b> , carries generally from four to five flowers on a stem, broad white perianth and golden cup, prettily fluted, height 21 inches . . . . .	2.50	
	<b>Lucia</b> , yellow perianth with golden yellow eye, talk; 7—8 flowers on a stem . . . . .	5.—	
Lug	<b>Profusion</b> , white, yellow eye, splendid flower, 6 blooms on a stem . . . . .	1.75	17.—
	<b>Sunset</b> , sulfer yellow perianth with orange eye, large flowers, 6 flowers on a stem . . . . . each —.60		
Lugdor	<b>Triumph</b> , bearing generally three large flowers on a stem, perianth broad and snowy white, cup golden yellow, prettily fluted, height 15 inches . . . . .	5.—	

## Different Kinds of Narcissus.

Lubric	<b>Backhousi Wm. Wilks</b> , primrose perianth, cup orange . . . . .	1.75	
	<b>Biflorus</b> , sulphury yellow . . . . .	—50	3.75
	<b>Gracilis (Helene)</b> , sulphury yellow . . . . .	2.50	
	<b>Intermedius major</b> , cream yellow petals, yellow cup. . . . .	2.50	
	<b>minor</b> . . . . .	2.50	
	<b>sunset</b> , true, golden yellow . . . . .	6.	
	<b>Junceaefolius</b> , yellow flowers, sweet scented . . . . .	3.—	
	<b>Macleaii</b> Panza bicolor and Diomedes minor, flowers small white perianth, yellow goblet-shaped cup, robust and dwarf, a charming little daffodil, height 4 inches . . . . .	7. —	
	<b>Montanus Poculiformus</b> , drooping flowers, cup and perianth silvery white . . . . .	15.—	
Luce	<b>Schizanthus Orientalis</b> , perianth creamy yellow, cup orange . . . . .	1.75	
	<b>Triandus albus</b> , silvery white flowers . . . . .	1.50	13.50
	<b>calathinus</b> , true . . . . . each —.50		
	<b>concolor</b> , clear yellow . . . . . " —.25

# Paeonia flowered Dahlia's.

p 100  
\$ ct.

This new race of Dahlia's firstly displayed at a Royal Horticultural Meeting London 1906, created quite a stir. The flowers are large and well expanded and of a most graceful form, and we surely do not exaggerate by saying they are the finest Dahlia's ever offered to the public.

Andrew Carnegie (1908). Different from the others in form and habit, strong stems. Very useful for decorative work. Colour salmon pink with bronze shading, height 4 feet . . . . .	18.—
Baron G. de Grancy (1906). Beautiful habit, flowers on long stems rising above the foliage, white colour; floriferous height 5 feet. . . . .	10.—
Bertha von Suttner (1908). Blush mauve with a rosy salmon tint. Of compact and sturdy growth and very floriferous. Flowers often measuring 8 inches in diameter height 3½ feet. . . . .	18.—
Dr. K. W. v. Gorkum (1906). Blush white, very large pointed flowers height 5 feet . . . . .	10.—
Duke Henry (1906). Large purple crimson, very decorative, 5 feet . . . . .	10.—
Geisha (1908). A wonderful scarlet and yellow flower, a variety of great merit, height 5 feet . . . . .	18.—
Germania (1908). Bright glowing crimson, very attractive, height 3 feet . . . . .	10.—
Glory of Baarn (1906). Large flowers of a light rosy tint, height 4 feet . . . . .	10.—
Glory of Groenekan (1907). Extra large flower, orange yellow, height 4 feet . . . . .	10.—
Hollandia, bright rose . . . . .	13.50
H. Hornsveld (1907). Enormous large flowers of very elegant form, soft salmon color, height 4 feet . . . . .	10.—
Hugo de Vries (1907). A dwarf variety, orange buff flowers, strong stems, typical forms, height 3 feet . . . . .	10.—

We can especially recommend this *Galanthus* for shop sale, even if kept in bags until the end of November there is hardly any loss in bulbs, while the old variety, as is well known, often gives a loss of 25 percent.

**Please Note.** We must inform our customers that we can supply home grown *Galanthus Elwesi* of the finest quality — the bulbs of these are generally of the size of small *Narcissus* — kindly ask for prices and samples, which may be had in July post free on application. Stock at least half a million.

*Elwesi robustus praecox*, splendid novelty may be forced, if placed in hot house, middle of Dec. at a temperature of 10° C.

Cable words.

Modest

**Gladiolus Hollandia.****A new Brenchlyensis variety.**

A free growing variety with flowerspikes rather longer than those of *Gladiolus Brenchlyensis*.

The flowers are large and well opened and of exceptional good form, even the smaller bulbs often produce **from 30 to 40 flowers on a single spike.**

The salmon shade rose color, makes it very distinct and delicate.

Planted in open ground, it is sure to give satisfaction, while as cutflower it is certain to find a ready sale.

per 100 \$ 1.50    per 1000 \$ 13.50    per 10,000 \$ 120.—

**Hybrids of Gandavensis.****Novelty 1908.**

**Miss Kitty Grullemans**, each —.25 per dozen 2.25.

This *Gladiolus* can be looked upon as the finest yet raised, it grows with remarkable vigor and flowers with a freedom that is sure to give satisfaction to all.

The tremendous size of deep purple flowers, which are very brilliant and striking, is unsurpassed.

# IRIS.

## Bulbous Iris. (Aug.-Nov.)

### Iris Alata or Scorpioides.

Mot	<b>Strong forcing bulbs</b> , extra selected . . . . .	1.80	16.—
Mother	" " " all flowering . . . . .	1.20	10.—

For early forcing no better. it flowers here in the open in January so that nobody will find it difficult to have it in bloom beginning of December or even earlier. Same treatment as given to tulips.

Flowers are of a lovely deep sky-blue color, with a few light and dark spots in the center. As other *Irissus* are not to be had at that time of the year it should prove very profitable for cutflower. As a pot plant, we advise to place 3 bulbs in each and when forced in this way they will be of great value to flowershops.

	<b>alata alba</b> . . . . . each	1.—

Moxa

**Iris filifolia.**

A grand variety for early forcing, color beautiful sky-blue, large and substantial flowers on strong stems. Height about 1½ to 2 feet.

Every grower, who forces Iris, should try it. Flowers three weeks earlier than any other Spanish Iris.

Price per 100 \$ 3.—; per 1000 \$ 24.—

# Spanish Iris.

# NOVELTIES.

Flower of a Regelio-Cyclus Iris.

## **Regelio=Cyclus (onco-Regelia) Iris.**

Awarded on the different London shows with first class Certificates  
and Awards of merit.

This beautiful new race of Iris, flowers and cultivates with great easiness, compared with the Oncocyclus Iris (Iberica, Lorteti etc.) who are most difficult of cultivation. The flowers are of the same size as ordinary Oncocyclus, with satiny white, rose, brownish or violet ground, veined black. Their strong and rather long stalks carry generally three to four flowers, while from three to four flowerstems on a plant may be expected.

	each \$ ct.
<b>Arkadie</b> , purplish red, veined brown on a white ground. . . . .	1.25
<b>Castor</b> , ruby red, veined bronze. . . . .	1.
<b>Charon</b> , F. C. Certificate London May 17, '04. Color dark brown, veined black, extra . . . . .	1.75

# DUTCH IRIS.

A NEW AND EARLY RACE.

This new strain has been sported by the crossing of Xiphiums, such as *filifolia*, *tingitana*, *Buritanica*, *Boissieri* and other early flowering varieties. It has entirely been cultivated in Holland and therefore the name of **Dutch Iris** is fully justified.

The flowers are a good deal larger than those of the ordinary Spanish Iris and characterised by wide faces covered with very conspicuous orange blotches. The prevailing tone of colour is that of the gentle shades which we meet with *Coquette des Blanchés* (*Louise*) and *La Tendresse*.

Curiously there are but a few yellows amongst them, so that stock of those is at present still restricted. The great value of those Irises is their **earliness**.

They are at least a fortnight earlier than the Spanish Irises. They will fill up the awkward gap after the tulips, and for this reason will be welcome additions to the gardeners' plant.

### NOTICE.

The Dutch forcing crowns we guarantee to give the greatest satisfaction if forced **after** January.

We must advise our customers, to order early and to lay the crowns in immediately, roots well covered, leaving the crowns fully exposed to the air, so that the frost can freely touch them.

After this treatment the flower will equal, in size and quality, those produced by the best of German or Berlin Crowns.

**Montbretsia Speciosa.**

This **Montbretsia** is certainly now one of the leading varieties, color bright orange red, on very strong stems. We dare say there is even amongst the more expensive varieties **no better**. If cut and placed in water, flowers will last over a fortnight.

Having cultivated a large stock of this grand variety, we are in a position to offer it very reasonable.

Price per 100 —.60 per 1000 5.— per 10,000 36.—

MORPHIXIA.

## MORPHIXIAS.

(Aug.-Nov.)

A splendid bulbous plant much in the same habit as **Ixias**. They grow however dwarfer and are later in bloom — when in bloom they last a considerable time, they may be easily grown in pots.

LONGIFLORA, pale buff.

## SCILLA.

Great Novelty 1908.

### Scilla Cilicicus.

Octod

With much pleasure and confidence we can recommend our friends to favor us with a trial order for Scilla Cilicicus.

Producing with great abundance flowers of the most beautiful blue color imaginable, it is sure to give the highest satisfaction. May be forced in the ordinary way and blooms much earlier than Scilla Siberica.

Through the precocity and constancy of the flowers it will soon push the old Scilla Siberica off the market. We can offer as follows:

Extra selected bulbs	per 100	1.50	per 1000	12.—	per 10.000	110.—
" first size "	" "	1.25	" "	10.—	" "	75.—
Ordinary " " "	" "	1.—	" "	7.50	" "	60.—

Early orders solicited.

Postage extra —.60 per dozen plates. — No less than one dozen plates can be supplied at this rate.

**In ordening please state varieties preferred.**

Tulips Growing in fibre

Roman Hyacinths growing in fibre.

Narcissus growing in fibre.

The growth of bulbs in Fibre, in china vases or bowls **without Drainage**.

The best and most charming way of growing spring bulbs for house and table decoration.

The wonderful success we have achieved in growing bulbs, such as Roman Hyacinths, Paper whites, Dutch Hyacinths, Tulips and Narcissus in our special fibre, using china vases **without drainage**, proves, that it is not only a most charming and effective method of growing bulbs for those who have neither a large garden, the conveniences of greenhouses, or frames, or have a difficulty in obtaining suitable soil, but that it is also one which we feel sure is being, and will be, much more extensively adopted in the future when it is fully realised what can be done in this way.

The advantage of this system is, that the vases can be placed any where about the house, in the drawing-room or dining-room, without fear of any mess from water or soil coming through the base of pots. The Fibre is perfectly odourless, and clean to handle. It is specially and carefully prepared by ourselves for this purpose and we strongly recommend all our correspondents to try a few various bulbs in this way if they have not yet done so.

The bulbs are potted the same way as in ordinary soil just showing their tops. It is **not necessary** or **desirable** to press the fibre **tightly**, otherwise the roots do not work freely, and bulbs have a tendency to push themselves upwards. Once potted, they require hardly any attention, only **great** care should be taken to keep the compost moist, but on no account must it be **sodden or too wet**.

If **once** allowed to become dry, even for half a day only, the pores of the roots close up and the bulbs in many cases go blind and are ruined. This happens more frequently with Tulips than Narcissus, the tulip roots being finer and therefore more liable to injury.

When the bulbs have been potted, vases or jars should be kept in a **dark** airy cellar or room nothing is worse than a confined cupboard or a small, airless dark room.

When the bulbs have grown about one inch, they should be brought into more light, and the vases or bowls can be placed in the window, taking care, of course, to keep them from frost. **All** bulbs can be grown in fibre but in Hyacinths we have a special size which is best for this way of cultivation.

We are offering ten distinct shades at \$ 35.— per 1000. Miniature Hyacinths grow freely and look very nice in bowls, mixed colors should never be used as they come to uneven.

The fibre is carefully mixed and packed by ourselves and shipped dry so as to cost as little freight as possible.

A case containing about 15 bushels costs \$ 3.— a smaller size containing about 7 bushels is charged \$ 2.— for.

P. S. Some of our rivals are using coconut fibre for this kind of cultivation, but this does not by any means give the same satisfaction, our fibre being the original plant fibre and therefore far superior to this imitation.

1913.

WHOLESALE ONLY.

CATALOGUE

OF

DUTCH BULBS AND PLANTS

OFFERED FOR SALE BY

*J. J. Grullemans & Sons,*

Royal West-End-Nurseries

ESTABL. 1854.

LISSE-HOLLAND.

*All former quotations are annihilated by those of the present pricelist.*

PRINTED BY P. J. MULDER & SON, LEYDEN (HOLLAND).

*Gentlemen,*

We have much pleasure in presenting for your kind perusal our Bulb-Book for 1913, the **largest** and **most complete** issued by any Dutch Firm.

The continued increase in our business, proves that our efforts to have orders executed with all possible speed, and with best class bulbs and plants **only**, are successfull.

As to Firms, we did not yet deal with, we shall be glad to furnish them with such references as will give them sufficient confidence, that their orders, if placed with us, are in good hands.

Recommending our bulbs to the **Wholesale Trade** we wish to assure our friends that they will be thoroughly gratified when receiving our goods.

We have put our prices so that in most cases you will find them correct. Should you however have a lower offer from any other reliable Dutch House, we shall be glad to be informed, and we promise to do all in our power to meet you.

Lisse, as you may be aware, is now the leading centre of the Bulb-Trade.

Trusting we may be favored with the continuance of your esteemed commands.

Yours respectfully, .

J. J. GRULLEMANS & SONS.

---

## COMPLAINTS.

No complaints can be entertained unless made on **receipt** of the goods, and we cannot take any responsibility as to their flowering which greatly depends upon their treatment, but every precaution is taken to send nothing but first sized well matured bulbs such as will under ordinary circumstances produce the very finest flowers and give the utmost satisfaction.

**Early orders are respectfully solicited.**

# Special terms of payment.

---

All accounts are payable on delivery of goods.

In ordinary cases however payment will not be required until 1st March following delivery, but an account must be paid forthwith should Messrs. Grullemans & Sons deem it necessary to demand immediate payment.

## ACCOUNTS, PAID WITHIN.

1 month from date of invoice are entitled to 5<sup>0</sup>/<sub>10</sub> discount.

2 months " " " " " " " " 4<sup>0</sup>/<sub>10</sub> "

3 " " " " " " " " 3<sup>0</sup>/<sub>10</sub> "

 *Accounts not paid within 12 months after date of invoice will be disposed of by draft at sight.*

*Orders from unknown correspondents must be accompanied by satisfactory references or one-half the amount of bill. Balance of amount to be paid on arrival of goods, for which 5<sup>0</sup>/<sub>10</sub> discount on the full amount is allowed.*

---

---

## Terms.

1. **Prices** are quoted nett and subject to market fluctuations.
2. **All goods** travel at purchaser's risk and expense from seller's stores.
3. **Unless** directions to the contrary are given, insurance will be provided at purchaser's costs.
4. **Packing** and cases will be charged at cost-price.
5. **J. J. Grullemans & Sons** give not warranty, express or implied, and will not be in any way responsible for the results of planting or forcing of any bulbs and roots they send out: they guarantee all varieties to be true to name and description.
6. **If at the time** of shipment the buyer has not yet settled his last year's account, sellers reserve to themselves a right to cancel all arrangements for new transactions.
7. **We emphatically** decline to deliver at erroneous prices, figuring in this catalogue, that might have escaped our notice.
8. **By accepting an order** we never deem ourselves obliged to supply all items in full, as this greatly depends upon the results of the crop.
9. **By placing orders**, buyers are considered to agree with those terms, even if they differ from the laws of their country.
10. **No cancelations or alterations** will be accepted later than April first.

# NOTICE.

25 roots will be charged at 100 rate.  
250 at 1000 rate.

Telegrams should be addressed:

**Grullemans, Lisse, Holland.**

If wiring, goods will leave with the next steamer from Rotterdam or Amsterdam.

Loke	<b>Golden Spur</b> , best of all narcissus, extra strong forcing bulbs. We guarantee these bulbs to produce <b>no less than 2 flowers</b> each but it is by no means seldom that they produced <b>3 or 4 flowers</b> . . . . . per 10,000	160.—	2.— 18.—

**A new, rare, and meritorious Variety  
for 1913.**

We can now offer a splendid novelty in double Narcissus, namely the

**Bicolor Horsfieldi flore plenum**

a variety which we can recommend our friends with safety and confidence as exceptionally showy and distinct. Price, at present, may prevent a large sale, but if this comes down, we are sure it will take the lead amongst the double Narcissus as a cutflower.

**Price per doz. \$ 1.— per 100 \$ 8.—**

		p. 100		p. 1000

## Double Chrysanthemum flowered Anemones.

The Chrysanthemum flowered Anemones are absolutely distinct from the ordinary double Anemones, the petals are all of the same form and beautifully imbricated, the plants are of very large size and produce an immense quantity of grand flowers. Highly recommended.

## **Growing Anemones and Ranunculus in cold climates.**

---

Anemones and Ranunculus should be kept in a dry warm place so that they remain hard and dry during the winter months, and when planted in about the end of April when all frost is out of the ground, they will bloom well. But when planted in the fall which is generally done, 80 or 90% is always lost through frost. Anemones and Ranunculus roots or bulbs can be kept for two or three seasons in a dormant condition without doing them any harm.

## Paeonia flowered Dahlia's.

p. 100  
\$ ct.

This new race of Dahlia's firstly displayed at a Royal Horticultural Meeting London 1906, created quite a stir. Flowers are large and well expanded and of a most graceful form, and we surely do not exaggerate by saying they are the finest Dahlia's ever offered to the public.

<b>Andrew Carnegie</b> (1908). Different from the others in form and habit, strong stems. Very useful for decorative work. Color salmon pink with bronze shading, height 4 feet . . . . .	12.—
<b>Baron G. de Grancy</b> (1906). Beautiful habit, flowers on long stems rising above the foliage, white color; floriferous height 5 feet . . . . .	7.—
<b>Bertha von Suttner</b> (1908). Blush mauve with a rosy salmon tint. Of compact and sturdy growth and very floriferous. Flowers often measuring 8 inches in diameter height 3½ feet . . . . .	12.—
<b>Dr. K. W. v. Gorkum</b> (1806). Blush white, very large pointed flowers height 5 feet . . . . .	8.—
<b>Duke Henry</b> (1906). Large purple crimson, very decorative, 5 feet. . . . .	8.—
<b>Geisha</b> (1908). A wonderful scarlet and yellow flower, a variety of great merit, height 5 feet . . . . .	10.—
<b>Germania</b> (1908). Bright glowing crimson, very attractive, height 3 feet . . . . .	7.—
<b>Glory of Baarn</b> (1806). Large flowers of a light rosy tint, height 4 feet . . . . .	9.—
<b>Glory of Groenekan</b> (1907). Extra large flower, orange yellow, height 4 feet . . . . .	9.—
<b>Hollandia</b> , bright rose . . . . .	12.—
<b>H. Hornsveld</b> (1907). Enormous large flowers of very elegant form, soft salmon color, height 4 feet . . . . .	8.—
<b>Hugo de Vries</b> (1907). A dwarf variety, orange buff flowers, strong stems, typical forms, height 3 feet . . . . .	8.—
<b>Kaiserin Augusta Victoria</b> (1907). Primrose color, bright flower, height 3 feet . . . . .	8.—
<b>King Edward</b> (1908). Large flower, purple crimson, very fine height 6 feet . . . . .	18.—

Cable words.

p. 100

<b>King Leopold</b> (1906) The best yellow color, varying from creamy yellow to white. Flowers very large and on long stems, height 5 feet	8.—
<b>La Riente</b> (1907). Nice pink flowers, long and strong stems, height 4 feet	7.—
<b>Mannheim</b> (1908) Very fine form on long strong stems; orange soft stone red, height 6 feet . . . . .	10.—
<b>Merveille</b> (1907) Rosy salmon, nice form, height 4½ feet . . . . .	9.—
<b>P. W. Jansen</b> (1907) Rosy salmon with a dash of yellow, height 5½ feet	8.—
<b>Queen Alexandra</b> (1908) Elegant flower. Sulphur and white. Height 4 feet	10.—
<b>Queen Emma</b> (1906). Rosy pink flowers, suffused with yellow and white Height 6 feet . . . . .	8.—
<b>Queen Wilhelmina</b> (1906). Pure white, elegant form; floriferous Height 4 feet . . . . .	8.—
<b>Sneeuwwitje (Snowqueen)</b> (1907). Pure white, strong plant. Height 4 feet	8.—
<b>Solfaterre</b> , scarlet, yellow center . . . . .	12.—
<b>Mixed varieties</b> (incl. 10 var.) . . . . .	8.—

**IRIS.****Bulbous Iris.** (Aug.-Nov.)**Iris Alata or Scorpioides.**

Mot	<b>Strong forcing bulbs</b> , extra selected . . . . .	1.80	16.—
Mothén	" " " all flowering . . . . .	1.20	10.—

For early forcing no better, it flowers here in the open in January so that nobody will find it difficult to have it in bloom beginning of December or even earlier.

Flowers are of a lovely deep sky-blue color, with a few light and dark spots in the center. As other *Irissus* are not to be had at that time of the year it should prove very profitable. As a pot plant, we advise to place 3 bulbs in each and when forced in this way they will be of great value to flowershops.

Motion	<b>alata alba</b> . . . . . each	1.—

Moxa

**Iris filifolia.**

A grand variety for early forcing, color beautiful sky-blue, large and substantial flowers on strong stems. Height about 1½ to 2 feet.

Every grower, who forces Iris, should try it. Flowers three weeks earlier than any other Spanish Iris.

Price per 100 \$ 3.—; per 1000 \$ 24.—

### NOTICE.

The Dutch forcing crowns we guarantee to give the greatest satisfaction if forced **after** January.

We must advise our customers, to order early and to lay the crowns in immediately, roots well covered, leaving the crowns fully exposed to the air, so that the frost can freely touch them.

After this treatment the flower will equal, in size and quality, those produced by the best of German or Berlin Crowns.

**Montbretsia Speciosa.**

This **Montbretsia** is certainly now one of the leading varieties, color bright orange red, on very strong stems. We dare say there is even amongst the more expensive varieties **no better**. If cut and placed in water, flowers will last over a fortnight.

Having cultivated a large stock of this grand variety, we are in a position to offer it very reasonable.

**Price per 100 —.50 per 1000 4.— per 10,000 30.—**
